

Year 7

Geography Programme of Study

In Year 7 you will focus on developing key geographical skills. You will become a fieldwork expert by developing map reading and research skills. You will do this by studying 6 different topics designed to help you investigate the world from right outside your doorstep to the far corners of the globe. You will begin to think about how people interact and affect the environment around them.

Your teacher throughout the year will check how well you are progressing in developing your geographical skills and understanding. You may be asked to work on your own, in a pair or in a small group to carry out your assessments.

Target level

Topic	Assessment	Level Achieved
