

Year 8

Geography Programme of Study

In Year 8 you will look more closely at your impact and reliance on the world around you. You will begin to question different perceptions about places and geographical issues as you develop a more in-depth understanding of how the world works. You will do this by studying 6 different topics, which will enable you to investigate and drill down into specific locations and issues.

Your teacher throughout the year will check how well you are progressing in developing your geographical skills and understanding. You may be asked to work on your own, in a pair or in a small group to carry out your assessments.

End of year target level		End of year 7 level achieved	
Topic	Assessments	Level Achieved
